

FOR IMMEDIATE RELEASE

***Ulrich medical USA™* Releases New Spinal Implants for U.S. Market *pezo*® PEEK Cage Implants**

Expands Market Offering with Three Universal Implant Systems for Intervertebral Body Fusion for Multiple Indications Including Degenerative Disc Disease

ST. LOUIS, MO (October 23, 2012) – *Ulrich medical USA*, Inc., today announced the U.S. market release of the *pezo*® PEEK cage implant family for both the posterior (*pezo*-P and *pezo*-T) and anterior approaches (*pezo*-A) for lumbosacral interbody fusion.

“We are very excited to release our new family of interbody cages. The German-designed *pezo* system features slimline, surgeon-optimized instrumentation that is standardized for all three cages. Each of our cages feature unique designs to meet surgeon demands. The *pezo*-P implant has a bulleted nose and is available in a unique footprint up to 29mm in length. The *pezo*-T implant is a banana/bullet design and has one of the largest footprints available on the market with a 34X16mm (length to width) option and the *pezo*-A has a large footprint which also accommodates a lateral approach,” said Tom Carter, Senior Marketing Manager, *Ulrich medical USA*.

The implants are available in numerous heights and angles and are individually sterile packaged.
